0.05 pc

This figure is a contour plot showing astronomical data in Right Ascension (RA) and Declination (DEC) coordinates. The x-axis represents RA [J2000] in hours, minutes, and seconds, with major ticks at 5^h35^m24^s and 20^s. The y-axis represents DEC [J2000] in degrees, arcminutes, and arcseconds, with major ticks at -5°06'30", 07'00", 30", and 08'00". The plot features two sets of contour lines: red and blue. The red contours are concentrated in the lower-left and lower-right regions, while the blue contours form a large, irregular shape in the upper-right. Several black symbols are overlaid on the contours: two squares, two crosses, and several dots. A solid black line and a dashed blue line are also present. A scale bar in the bottom right corner indicates a length of 0.05 pc.
